SOFTWARE DEVELOPER

TECHNICAL SKILLS

- MERN Developer
- C/C++
- Data Structure and Algorithms
- Networking
- Flutter
- Data Analysis
- Arduino/Raspberry pi
- Burp Suite
- API's

PROFESSIONAL EXPERIENCE

Product Engineer | SuperKalam Aug 2025 - Present

- Developed and deployed a cross-platform UPSC learning application.
- Implemented user-friendly interfaces with Animations
- Optimized app performance and user experience across iOS and Android platforms

Software Development Engineer (SDE) | Swipe Feb 2025 - July 2025

- Developed and optimized Android SDK integration that reduced client implementation time by 65%, leading to faster merchant onboarding and increased adoption rates

Application Developer | SixD Engineering Solutions Feb 2024 - Feb 2025

- Developing a training simulation Application for MNC's like Schindler, Nippon Steels, Wipro, etc...
- Designed and implemented innovative training simulations utilizing for MNC's.

Campus Organizer/Lead | Google Developer Group Aug 2024 - Dec 2024

- Lead and manage a developer community of 800+ members
- Organize technical workshops, hackathons, and networking events
- Foster collaboration and knowledge sharing among community members

Full Stack Mobile Developer | Coral Jan 2023 - October 2023

- Developed hybrid mobile applications using Flutter framework
- Integrated custom APIs and implemented cross-platform functionality

Full Stack Web-Developer | Disha Creation Jan 2022 - July 2022

- Developed frontend using React.js, TypeScript, and Material UI
- Implemented backend solutions using Firebase

EDUCATION

Eklavya International Academy | Science Maths | Jaipur March 2019 - April 2021

B.Tech | Computer Science Engineering | JK LakshmiPat University August 2021

PROJECTS

AI Documentation (Docs.Ai) | AI/ML Project January 2025 - Present

- Built an AI documentation tool that extracts code comments to generate technical documentation, reducing documentation time by 75% and improving developer workflow.

Indian Sign Language Conversations System | ML Project August 2023 - November 2024

- This ML project develops a system for translating Indian Sign Language into text or speech, utilizing image processing, NLP, and ML techniques. Created our own dataset available on kaggle and got 75% accuracy.

CDMArena: Dynamic MERN-Based Platform for Device Specs & Tech News | MERN June 2024

- Developed TechSpecs Hub, a dynamic MERN-based platform for mobile and computer specs and tech news. Implemented a comprehensive database with MongoDB and a responsive React frontend.

Imagination - Ai Photo Editor | MERN May 2024

- Developed an AI Photo Editor where user can change the clothes styling of hair and you can make all changes using help of Ai.

Jigyasa Web-Development and Flutter App June 2022

- This React application aims to be a knowledge-sharing hub, connecting users with companies and organizations, while analyzing user data to provide personalized recommendations.

AWARDS / CERTIFICATES / ACHIEVEMENT

- CCNA v7 - Introduction to Networks
- CCNA v7 - Switching and Routing
- CodeChef 4 Star
- Freelance - UpWork/Fiverr/Freelancer (Completed 25+ Projects)
